PROFILE SUMMARY

Senior QA Engineer with 8+ years of experience in manual and automation testing, specializing in building scalable test frameworks for web and API platforms. Strong expertise in Cypress, Selenium, Postman, CI/CD pipelines, and Agile delivery. Known for driving quality initiatives, mentoring QA teams, improving test processes, and collaborating cross-functionally to deliver high-quality products. Passionate about enhancing automation efficiency and implementing modern testing practices.

CORE SKILLS

Automation: Cypress (JS/TS), Selenium (Java), Katalon Studio (Groovy)
API Testing: Postman (Manual & Automation), REST API
Tools: Jira, Git, Jenkins, TeamCity, Grafana
Testing: Functional, Regression, Smoke, BDD/TDD, STLC/SDLC
Programming: Java, JavaScript, TypeScript
Other: DevOps collaboration, Test strategy, Documentation, Mentoring

PROFESSIONAL EXPERIENCE

Coda - Senior Software Development Engineer in Test (SDET) (Jan 2022 - Oct 2025)

- Designed and maintained automation frameworks using Cypress and Postman.
- Transformed business requirements into structured, testable acceptance criteria and high-coverage test cases.
- Performed Web and API testing to ensure feature reliability across releases.
- Monitored application performance metrics using Grafana.
- Led end-to-end Web and API test strategy across multiple cross-functional releases.
- Mentored new QA members and onboarded new joiners to project workflows.
- Collaborated closely with Developers, PO, and Designers to clarify acceptance criteria.
- Key Project: Coda Portal

Coda - Quality Assurance Engineer (Sep 2020 - Dec 2021)

- Executed manual and automation testing for web and backend API systems.
- Managed deployment workflows to test environments using Jenkins.
- Conducted functional, regression, and smoke tests before release cycles.
- Delivered sprint demos to stakeholders and contributed to Agile ceremonies.
- Key Projects: Back Office CRM, xShop, Coda Portal

Wirecard - Senior Quality Assurance Engineer (Jul 2019 - Sep 2020)

- Enhanced internal Java-based QA tools for automated reporting and test case analysis.
- Developed a Java tool to automatically generate automation scripts from Excel input.
- Mentored QA engineers on test case writing and Katalon Studio automation.
- Maintained automation reports and pipelines using Jenkins.
- Key Responsibility: R&D for new testing tools and methodologies.

Wirecard - Quality Assurance Engineer (May 2017 - Jun 2019)

- Created structured test case documents and executed detailed manual testing activities.
- Developed automation scripts for multiple enterprise projects.
- Performed testing for banking systems, API services, and release management tools.
- Key Projects: Mandiri Lead Management System, Affin Bank Malaysia, Open API, Release Management Tool

FREELANCE EXPERIENCE

Binar Academy - QA Facilitator (Sep 2022 - Oct 2022)

- Delivered a 6-week QA bootcamp covering QA fundamentals, SDLC/STLC, TDD, BDD, and Agile practices.
- Conducted training on Test Case Management, Bug Reporting, and test documentation.
- Guided hands-on API testing workshops using Postman (manual + automation).
- Mentored participants through real-world testing scenarios and career readiness.

EDUCATION

President University (2014 - 2018)

- Bachelor of Science in Computer Science
